

## Product Data

## Product Specifications

- For installing 2 -hole stud mounted urinals with rear water inlet. NOTE: Not for hanger mounted urinals or spud mounted flushometer valves
- For HyTouch urinal controls with plate size $5.1 \times 5.1^{\prime \prime}(130 \times 130)$
- Fits within minimum 3" (75) plumbing wall
- 1/2" water supply

## Features

- Square structural 16 gauge powder coated steel frame
- Stop valve with throttle pre-mounted
- Vacuum breaker
- Fully height-adjustable frame, flush valve rough-in, water inlet, mounting studs and waste outlet
- Fastening for outlet bend sound-absorbing
- Mounting hardware

## Warranty

Limited lifetime warranty on carrier.

## Standards

In compliance with

- ASME A112.6.2
- ASSE 1037
- CSA B125.3

## Material Determination

Recommended material for wall surface construction:

- Gypsum / green board
- Cement board
- Tile backer board
- Ceramic tile surface

1 Wall thickness not to exceed $31 / 2^{\prime \prime}$.

## Installation

## Installation Requirements

To install carrier, a minimum 3" (75) wall is required. A $2 \times 6$ " wood frame or metal frame construction is recommended. Studs must be placed 19 3/4" apart (clearance) where carrier will be positioned inside the wall.

## Prepare

These values are needed to set proper values at roughing in: FF: Finished Floor Height
FRH: Finished Rim Height
UT: Urinal Top Height, based on ceramic model and FRH
FV: Flush Valve Height, subject to conditions below
FV_min: minimum Flush Valve Height $=U T+31 / 2^{\prime \prime}(90)$
H_min: minimum Frame Height

$$
\begin{aligned}
= & \mathrm{UT}+81 / 4^{\prime \prime}(210) \text { or } \\
& 441 / 8(1200), \\
& \text { whichever is greater. }
\end{aligned}
$$

H_max: maximum Frame Height $=513 / 16^{\prime \prime}(1300)$
For convenience, values are calculated in the included chart.
Ceramic manufacturer specifications are subject to
change without notice.
Always refer to the ceramic manufacturer
specification sheet for the latest information!
Geberit is not responsible for inaccuracies or
changes in the information contained in the chart.

These dimensions are used later, after frame is installed:
R: Rod Height, based on ceramic model and FRH
W: Water Inlet Height, based on ceramic model and FRH
D: Drain Outlet Height, based on ceramic model and FRH
RC: Rod Center-to-Center Distance, based on ceramic model
