GEBERIT SHOWCASES SUSTAINABLE SYSTEMS AND NEW ACTUATORS AT PCBC 2019

DES PLAINES, IL: Geberit North America will showcase the latest bathroom trends at the 2019 Pacific Coast Builder Conference (PCBC) in San Francisco, California May 30-31, 2019. Displays in the Geberit booth will illustrate how Geberit in-wall systems for wall-hung fixtures can accommodate bathroom design challenges with versatility, reliability, and enhanced function and style, no matter the size of the space. The booth will also display brand new Geberit actuator plate designs and finishes for 2019.

Visitors to PCBC will learn about the Geberit system's expanding role in water efficiency and modern bathroom design. Attendees will see how the system is inspiring new creativity and how wall-hung technology is a beneficial tool for addressing new challenges in home design, such as the growing need for 'aging in place' solutions. Geberit will also showcase brand new actuator plate designs and finishes, including updates to the company's popular Sigma20, Sigma30 and Sigma50 flush plates.

"PCBC 2019 is the perfect opportunity to showcase the benefits of in-wall systems for builders and homeowners," says Ronn Jefferson, product manager for Geberit North America. "Because the tank is concealed behind the wall and the bowl is raised off the floor, the Geberit system provides unmatched versatility compared to a standard toilet. Designers and builders have the ability to work around space constraints, making the system ideal for virtually any project. With improved water savings and an expansive selection of new flush plate designs, Geberit is ideal for both residential and commercial projects."

Geberit systems increase usable space in bathrooms, giving the bathroom designer unlimited possibilities. Because the toilet tank is hidden behind the wall, the decorative flush plate attached to the wall is the only visible component of the Geberit system. This provides a sleek, modern look and improves hygiene by streamlining bathroom cleanup.

Geberit systems increase accessibility, save water with built-in dual-flush technology, and offer increased reliability over standard bathroom plumbing hardware.

Visit Geberit at booth #664 during PCBC 2019. The event is being held May 30-31, 2019 at the Moscone Center, 747 Howard St., San Francisco, CA.

PCBC is the largest homebuilding tradeshow representing the west coast region. This event is open to anyone professionally involved in the building industry, including builders, developers, architects, remodelers, designers, contractors, dealers/distributors and suppliers/manufacturers.

The globally operating Geberit Group is a European leader in the field of sanitary products. Geberit operates with a strong local presence in most European countries, providing unique added value when it comes to sanitary technology. The production network encompasses 29 facilities. The Group is headquartered in Rapperswil-Jona, Switzerland. In North America, Geberit provides concealed systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding unsightly plumbing hardware. Replacing a standard toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation. With around 12,000 employees in around 50 countries, Geberit generated sales of CHF 3.1 billion in 2018. The Geberit shares are listed on the SIX Swiss Exchange and have been included in the SMI (Swiss Market Index) since 2012.

For additional information, contact Geberit North America at 2100 South Clearwater Drive, Des Plaines, Illinois 60018, or call 800-566-2100. You can also visit Geberit North America at geberit.us.
