GEBERIT EXPANDS WATERSENSE® LISTED IN-WALL TOILET SYSTEM COMBINATIONS

Des Plaines, IL: Geberit introduces an expanded list of wall-hung toilet and in-wall system combinations that are certified to meet EPA WaterSense® criteria. The new listing includes in-wall systems for 2x4 and 2x6 construction, with flush volumes of 1.6 and 1.28 GPF. The in-wall systems are paired with a variety of wall-hung toilets from major fixture manufacturers.

“The expanded combinations give designers, architects and homeowners greater flexibility and freedom to choose bowls for bathroom applications that save water and money,” says Ronn Jefferson, product manager for Geberit. The new combinations help designers and architects meet the requirements of high-efficiency water programs such as LEED® and local codes requiring a reduction in flush volume.

The toilet accounts for nearly 30 percent of an average home’s indoor water consumption. Older toilets could use as much as 6 gallons per flush, making them a major source of wasted water in homes.

In addition to in-wall toilet systems, Geberit manufactures systems for wall-hung urinals, bidets and washbasins (lavatories). Geberit in-wall systems conceal unsightly plumbing hardware behind the wall. The flexible, adaptable Geberit systems are designed for easy installation: using a minimum of standard tools, the system easily attaches to wall framing. Engineered for long life and reliability, each in-wall system is built on a rugged steel frame. Once installed, the system is practically maintenance-free. Should it become necessary, however, simple maintenance can be accomplished without the use of tools.

For a complete listing of compatible in-wall system and wall-hung toilet bowl combinations, download the Geberit brochure, *Clean Design*, at:

The Geberit Group is an integrated, global company and European leader in the field of sanitary products, headquartered in Switzerland. Geberit maintains a strong local presence on most continents, including North America, providing concealed systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding unsightly plumbing hardware. Replacing a standard toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance-free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation. With 35 production facilities and more than 12,000 employees in over 40 countries, Geberit generates net sales of CHF 2.6 billion. The Geberit

shares are listed on the SIX Swiss Exchange; since 2012, the Geberit share has been included in the SMI (Swiss Market Index).
