**GEBERIT FEATURED IN BATHROOM RENOVATION FOR DIY NETWORK'S "BATH CRASHERS"**

**Des Plaines, IL:** "Bath Crashers" host Matt Muenster uses the Geberit Concealed Tank and Carrier System to hide the toilet tank in the wall in a recent Austin, Texas bathroom renovation project on the DIY Network's newest season.

Muenster worked with the homeowners side-by-side and totally overhauled a bathroom in need of repair. It was transformed into a stunning, functional and modern living space with the help of a Geberit system.

Muenster, a licensed contractor and experienced high-end interior designer, selects a challenging bathroom renovation for each "Bath Crashers" episode by interviewing homeowners who are shopping in a home improvement store.

In the episode titled "Garage Door Bath Art," the first thing Muenster does is tear down the bathroom and throw the old floor-mounted toilet in the dumpster. During the design reveal, he explains the remodel design that utilizes the wall-mount toilet. Later in the program, the Geberit tank for the toilet is installed, hidden in the wall.

The Geberit Concealed Tank and Carrier System, as demonstrated in Muenster's design, increases usable space in full bathrooms and powder rooms, giving the interior designer unlimited possibilities. Because the integral toilet tank is hidden behind the wall, the decorative flush plate attached to the wall is the only visible component of the Geberit system. This provides a sleek, modern look and improves hygiene by making bathroom clean-up a breeze.

The Geberit system increases accessibility, saves water, and offers increased reliability over standard bathroom plumbing hardware. The flexible, adaptable in-wall carrier systems are designed for easy installation, attaching to existing wall framing and supply and waste piping using standard tools. Once installed, the system is practically maintenance-free. Should it become necessary, however, simple change-out of components can be accomplished without the use of tools.

Geberit North America is part of the Geberit Group, a European market leader and global provider of sanitary technology. Located in Des Plaines, Illinois, Geberit North America provides concealed tank and carrier systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding the unsightly toilet tank. Replacing a standard tank and toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation.

As European market leader, the Geberit Group is a global provider in the area of plumbing technology with sales of CHF 2.2 billion and about 6,100 employees in 41 countries worldwide.
