**NEW GEBERIT 1.28 GPF DUAL-FLUSH IN-WALL SYSTEMS FOR TOILETS REDUCE WATER USAGE**

**Des Plaines, IL:** New water-saving in-wall toilet systems from Geberit, paired with a compatible wall-hung toilet, reduce the full flush to a maximum of 1.28 GPF (4.8 LPF). The new systems offer the lowest flush volume available from any in-wall system manufacturer and are perfect for meeting building codes that require low-consumption toilets.

“The new 1.28 GPF Duofix systems deliver up to 20% water savings over standard units,” says Ronn Jefferson, Product Manager, Geberit. “Less water used means lower water bills and reduced stress on municipal wastewater systems. Geberit takes water conservation seriously, and these new systems offer dramatic water savings to designers and homeowners.”

In addition to lowering utility bills and contributing toward “Green Points” for certification, the new low-consumption in-wall systems are WaterSense® compliant when paired with certain wall-hung toilets. This certification will help to meet requirements of high-efficiency water programs and comply with LEED®v4 criteria.

Geberit low-consumption in-wall systems are available for 2x4 and 2x6 room-height walls and 2x6 pre-wall installations. The new in-wall system gives designers, architects and homeowners the same flexibility as standard Geberit systems, as well as other benefits like easy cleaning, improved hygiene, enhanced safety and simple maintenance. Complete details on the new systems, including specification sheets and installation instructions, are available at [geberit.us](http://geberit.us).

The Geberit Group is an integrated, global company and European leader in the field of sanitary products, headquartered in Switzerland. Geberit maintains a strong local presence on most continents, including North America, providing concealed systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding unsightly plumbing hardware. Replacing a standard toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance-free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation. With 35 production facilities and more than 12,000 employees in over 40 countries, Geberit generates net sales of CHF 2.6 billion. The Geberit shares are listed on the SIX Swiss Exchange; since 2012, the Geberit share has been included in the SMI (Swiss Market Index).
